

BUNKERING SAFETY-CHECKLIST

Port of Duqm

Date:/...../20....

Vessel:

Bunker barge:

Master:

Master:

1. Bunkers to be Transferred

Grade	Tonnes	Volume at loading Temp	Loading Temperature	Maximum Transfer Rate	Maximum Line Pressure
Fuel Oil					
Gas Oil/Diesel					
Lub. Oil in Bulk					

2. Bunker tanks to be loaded

Tank No	Grade	Volume of Tank @ _____ %	Vol. of Oil in Tank before Loading	Available volume	Volume to be Loaded	Total Volumes Grade

3. Checks by barges prior to berthing

Bunkering	Ship	Barge	Code	Remarks
1. The barge has obtained the necessary permissions to go alongside receiving Vessel.				
2. The fenders have been checked, are in good order and there is no possibility of metal to metal contact.			R	
3. Adequate electrical insulating means are in place in the barge-to-ship connection.				
4. All bunker hoses are in good condition and are appropriate for the service intended.				
5. The barge is securely moored.				
6. There is a safe means of access between the Vessel and barge.				
7. Effective communications have been established between Responsible Officers.			A R	VHF Ch ... Primary system: ... Backup System: ... Emergency Stop Signal: ...
8. There is an effective watch on board the barge and on the Vessel receiving bunkers.				
9. Fire hoses and fire-fighting equipment on board the barge and Vessel are ready for immediate use.				
10. All scuppers are effectively plugged. Temporarily removed scupper plugs will be monitored at all times. Drip trays are in position on decks around connections and bunker tank vents.			R	
11. Initial line up has been checked and unused bunker connections are blanked and fully bolted.				
12. The transfer hose is properly rigged and fully bolted and secured to manifolds on Vessel and barge.				

13. Overboard valves connected to the cargo system, engine room bilges and bunker lines are closed and sealed.				
14. All cargo and bunker tank hatch lids are closed.				
15. Bunker tank contents will be monitored at regular intervals.			A R	At intervals not exceeding Minutes
16. There is a supply of oil spill clean-up material readily available for immediate use.				
17. The main radio transmitter aerials are earthed and radars are switched off.				
18. Fixed VHF/UHF transceivers and AIS equipment are on the correct power mode or switched off.				
19. Smoking rooms have been identified and smoking restrictions are being observed.			A R	Nominated smoking Rooms Tanker: Barge:
20. Naked light regulations are being observed.			R	
21. All external doors and ports in the accommodation are closed.			R	
22. Material Safety Data Sheets (MSDS) for the bunker transfer have been exchanged where requested.			R	
23. The hazards associated with toxic substances in the bunkers being handled have been identified and understood.			R	H2S Content ... Benzene Content ...

DECLARATION

We have checked, where appropriate jointly, the items of the Check-List in accordance with the instructions and have satisfied ourselves that the entries we have made are correct to the best of our knowledge.

We have also made arrangements to carry out repetitive checks as necessary and agreed that those items coded 'R' in the Check-List should be re-checked at intervals not exceeding hours.

If, to our knowledge, the status of any item changes, we will immediately inform the other party.

Guidelines for Use International Safety Guide Appendix 6 (chapter 25.4.3 ISGOTT)

The following guidelines have been produced to assist Vessel, barge and terminal operators in their joint use of the Bunkering Safety Check-List.

The Bunkering Safety Check-List uses statements assigning responsibility and accountability.

Ticking or initialing the appropriate box, and finally signing the declaration, confirms the acceptance of obligations. Once signed, this provides the minimum basis for safe operations as agreed through a mutual exchange of critical information.

Some of the Check-List statements are directed to considerations for which the Vessel has sole responsibility and accountability, some for which the barge has sole responsibility and accountability and others which assign joint responsibility and accountability. Shaded boxes are used to identify statements that generally may be applicable to only one party, although the Vessel or barge may tick or initial such sections if they so wish.

The assignment of responsibility and accountability does not mean that the other party is excluded from carrying out checks in order to confirm compliance. The assignment of responsibility and accountability ensures clear identification of the party responsible for initial and continued compliance throughout the transfer activity.

The Responsible Officers completing the Check-List should be the people carrying out the bunkering operation.

The Tanker's Responsible Officers should personally check all considerations lying within the responsibility of the Tanker. Similarly, the barge's Responsible Officer should personally check all considerations that are within the responsibility of the barge. In fulfilling their responsibilities, Responsible Officers should assure themselves that the standards of safety on both sides of the operation are fully acceptable. This can be achieved by means such as:

- Confirming that a competent person has satisfactorily completed the Check-List.
- Sighting appropriate records.
- By joint inspection, where deemed appropriate.

For mutual safety, before the start of operations, and from time to time thereafter, a barge representative and a Vessel's officer should conduct inspections of the barge and the Vessel to ensure that their obligations, as accepted in the Check-List, are being effectively managed.

The Bunkering Safety Check-List contains the following sections:

1. Bunkers to be transferred:

A joint agreement on the quantity and grades of bunkers to be transferred, together with agreed transfer rates and the maximum line back pressures.

2. Bunker Tanks to be loaded

An identification of the tanks to be loaded with the aim of ensuring that there is sufficient space to safely accommodate the bunkers to be transferred. Space is provided to record the each tank's maximum filling capacity and the available volume.

3. Checks by Barge Prior to Berthing

This section provides the checks to be carried out before the barge goes alongside the Vessel.

4. Checks Prior to Transfer

This section provides the checks to be jointly undertaken before transfer activities commence.

The safety of operations requires that all relevant statements are considered and the associated responsibility and accountability for compliance accepted. Where either party is not prepared to accept an assigned accountability, a comment must be made in the Remarks column and due consideration given to whether operations should proceed.

Where an item is agreed not to be not applicable to the Vessel, to the barge or to the operation envisaged, a note to that effect should be entered in the 'Remarks' column.

The presence of the letters 'A' or 'R' in the Code column indicates the following:

A ('Agreement'). This indicates an agreement or procedure that should be identified in

The Check-List or communicated in some other mutually acceptable form.

R (Re-check'). This indicates items to be re-checked at appropriate intervals, as agreed between both parties and stated in the declaration.

The joint declaration should not be signed until all parties have checked and accepted their assigned responsibilities and accountabilities.
